

Fig. 3 is a cross-sectional view of a device. It features a central vertical component with a textured, hatched pattern. A circular ring is positioned around this central component. The device is enclosed in an oval-shaped housing. Various parts are labeled with numbers: 3 points to the outer housing; 4 points to a top connection; 5 points to a side connection; 6 points to the top of the central component; 7 points to a small component on the right; 8 points to the bottom of the central component; 9 points to the right side of the central component; 10 points to the right side of the housing; 11 points to the right side of the central component; 12 points to the left side of the central component; 13 points to a side connection; 14 points to a bottom connection; 15 points to the bottom of the central component; and 24 points to the right side of the central component.
